

# Report Generation Guide

## Operational Guide to Executive PDF Exporting and SWOT Summarization

### 1. Executive PDF Reports

---

CIVORA provides a reporting module under the 'Reports' dashboard tab. It aggregates data into clean, executive-friendly summaries.

Users can download these reports as PDF files. The export includes charts and SWOT analysis details.

### 2. SWOT Logic & Derivation

---

- \* Strengths: Highlights the top-performing sales category and region based on total revenue contribution.
- \* Weaknesses: Flags cost pressures if cumulative profit margins fall below 15%, or highlights high category concentration if sales are limited to a single segment.
- \* Opportunities: Estimates next-period revenue based on growth rates and suggests replicating successful regional strategies.
- \* Threats: Flags declining performance if growth rates are negative, and prompts review of inventory and tax configurations.

### 3. Exporting PDF Reports

---

1. Navigate to 'Reports'.
2. The system fetches and aggregates data across all active projects.
3. Review the SWOT analysis and trend summaries.
4. Click 'Download PDF' to generate the report file.
