

Business Analytics Glossary

Definitions of Terms Used in the CIVORA Platform

1. Aggregation

The process of consolidating multiple transaction rows into single figures (e.g., total monthly revenue) to analyze trends.

2. Margin

The ratio of net profit to gross revenue, indicating the efficiency of sales operations.

3. Preprocessing

Cleaning and formatting raw datasets prior to analysis, including state name normalization.

4. SWOT Analysis

A framework for evaluating Strengths, Weaknesses, Opportunities, and Threats based on business data.

5. Trend Line

A visual indicator on charts representing the direction of sales performance over time.
